Buffalo, NY 14228 ♦ 7163445027 ♦ shaldas.1998@gmail.com ♦ www.linkedin.com/in/shalini-das--06-10-mis

PROFESSIONAL SUMMARY

Product professional with 2+ years of industry experience and an M.S. in Management Information Systems, experienced in product strategy, user research, market analysis, roadmap development, feature prioritization, and KPI driven decision making. Led cross-functional initiatives, translate customer insights into product requirements, and deliver data informed solutions across enterprise and client facing products.

EDUCATION

Master of Science: Management Information Systems, Expected in 08/2026

University At Buffalo, The State University of New York - NY

- Relevant Coursework: Digital Product Management, Systems Analysis and Design, Gen AI, Applied AI for Managers, DBMS, IS Audit
- GPA: 3.75/4.0 GPA

Bachelor of Technology: Electronics And Telecommunication Engineering, 05/2022

Kalinga Institute of Industrial Technology - Bhubaneswar, India

- GPA: 9.27/10.0

EXPERIENCE

Product Manager Intern, 05/2026 - 08/2026

UB Project Clinic [Client: Merchants Insurance Group] – NY

- Led product discovery for Merchants Insurance Group's mobile application by evaluating customer experience and identifying modernization opportunities.
- Benchmarked mobile self service capabilities across five national and regional insurers (GEICO, Progressive, Hartford, Utica, Amica), identifying gaps in payments, policy access, claims support, and account management to inform modernization recommendations.
- Developed customer personas and synthesized user insights from behavioral analysis, customer feedback, and App Store reviews to prioritize features and improve user experience.
- Partnered with client stakeholders to define business objectives, align product strategy, and present recommendations for mobile application modernization.

Product Strategy Consultant, 05/2026 - 08/2026

UB Project Clinic [Client: Ticketing Co] – NY

- Partnered with Ticketing Co leadership to assess historical event and customer data, identifying opportunities for standardized event classification, audience analytics, and AI-assisted workflows.
- Led product discovery and requirements gathering to define a phased roadmap for event taxonomy and historical event classification.
- Developed a scalable event taxonomy framework to standardize event classification and enhance future analytics capabilities.
- Analyzed event data and audience patterns to define classification logic, metadata standards, and reporting requirements.
- Engaged with stakeholders to assess business needs, enhance product strategy, and deliver strategic recommendations and implementation roadmaps.

Business Project Manager (UB Client Project), 02/2026 - 05/2026

VIA- Visually Impaired Advancement – Buffalo, NY

- Identified a 3–4 hour/day operational inefficiency and defined an MVP (order portal, admin dashboard, and automated workflows) that reduced manual processing time by 50%.
- Defined product requirements (PRDs) and collaborated with cross-functional stakeholders to gather requirements, prioritize features, and align solutions and translate business needs into scalable technical solutions.
- Led the end-to-end development of a Power Apps based inventory management system, enabling multi-facility order tracking and real-time inventory visibility. Automated inventory and validation workflows, reducing processing errors by 30% and improving operational efficiency.
- Centralized 193+ inventory records and designed scalable data architecture, improving data accuracy, accessibility, and order visibility.

Software Developer, 02/2023 - 10/2024

M/s Takashi Films Industries Pvt. Ltd. – Gurugram, India

- Managed and implemented robust server-side logic and database architecture using Java, .NET, MySQL, and PostgreSQL, ensuring optimal performance and user responsiveness.
- Developed and enhanced dynamic and interactive user interfaces using frameworks like AngularJS alongside core web technologies (HTML, CSS, and JavaScript).
- Optimized applications for performance, scalability, response time by ~25–30% and improving user experience
- Executed project initiatives by collaborating with cross-functional teams to analyze requirements and design solutions, enhancing release efficiency through agile development practices.

Software Engineer, 05/2022 - 01/2023

OPTUM UHG – Gurugram, India

- Integrated third-party APIs to enable real-time data exchange and enhance product functionality.
- Developed a modular Angular application and reusable UI components, accelerating feature delivery and improving user experience.
- Implemented RESTful APIs that reduced latency and improved data retrieval performance by 20–30%.
- Collaborated with cross-functional teams to develop scalable frontend services and integrate backend systems.
- Improved product quality and release reliability through comprehensive unit testing with Jasmine and Karma.

ACADEMIC PROJECT EXPERIENCE

CareSync Healthcare Engagement Platform | Academic Project | Spring 2026

- Led product discovery through user and market research to identify target personas, pain points, and healthcare engagement opportunities. Collaborated with a cross-functional team to translate product strategy into product requirements and user-centric designs.
- Defined product vision, roadmap, and prioritized 20+ features using a value vs. effort framework.
- Applied the AARRR framework to establish KPIs and success metrics (activation, retention), projecting a 15–20% improvement in user retention. Validated product decisions through hypothesis-driven analysis, success metrics, and user-centric prioritization.

CERTIFICATIONS

- Microsoft Product Management Professional Certificate — In progress, expected July 2026
- Google Project Management Professional Certificate — In progress, expected August 2026
- AI for Project Managers — Techacademy Global, 2026
- Data Collection and Processing with Python — University of Michigan

SKILLS

Product: Product Discovery, Product Strategy, User Research, Competitive Analysis, Roadmapping, Feature Prioritization, Requirements Gathering, PRDs, KPI Definition, AARRR, Stakeholder Management

Tools: Jira, Figma, Notion, Power BI, Microsoft Power Apps

Project: Agile/Scrum, Project Planning, Scope Management, Process Improvement, Cross-Functional Coordination, SDLC understanding, Design Thinking

Technical: SQL, Python, Java, .NET, AngularJS, REST APIs, PostgreSQL, MySQL, Data Analysis, Machine Learning (AI/ML), CSS, JavaScript
